

Do I need a Fire Protection Permit?

A local Fire Protection Permit is required when:

Fire Protection work requires a CDR through the State of Indiana

or

Fire Protection work is conducted during initial construction of a building that requires a Town of Avon Building Permit

or

Fire Protection work is part of a tenant space build-out that requires a Town of Avon Building Permit

A local Fire Protection Permit is NOT required when:

Fire Protection work is being done in a one- or two-family dwelling

or

Fire Protection work is being conducted as part of regular inspection, testing and maintenance and doesn't require a CDR or a Town of Avon Building Permit.
