

Vision Statement

The IND Aerotropolis is a dynamic, regional collaboration of governmental and private entities focused on transportation, logistics and cargo.

Mission Statement

The vision is supported by state and local leaders working cooperatively to facilitate, expedite and maximize regional economic growth for the benefit of business, residents and communities alike. This is achieved by maximizing the connectivity of our region's international airport, interstate highways, and rail facilities. Catalysts will include the development of readily available land assets, an educated and trained workforce and a competitive business environment.
