

Small cell node facilities and 5G service

The Town of Avon will soon begin receiving applications for companies to install 5G networks within town limits. These facilities may be collocated on existing poles or be entirely new installations.

Neighborhood or Homeowner Associations may register to be notified by US Mail of any application for construction or placement of Small Cell facilities on new utility poles or support structures within the Association's jurisdiction. To register, please email jstandifer@avongov.org
